

HALF-PALLET SUPPORTS

Usage:

- These accessories can be used either for supporting half Euro pallets (i.e. 600 x 800 mm) or as tunnel guards.
- As guards they are placed under each pallet that is immediately above a tunnel.
- The left to right spacers are designed to provide support for a dislodged or damaged pallet.

Product Description:

- Painted RAL 9002 (Grey White) as standard. Other colors can be supplied on requested
- Different models to suit various types of beams

Advantages:

- Can be used for the tunnel bays.
- Increases the stability of each racking level, distributing the load evenly.

Description

- The arrangement is consists of two front to back crossbeams and two left to right spacers welded together for greater stability and ease of installation.

Maximum load per one half pallet

- when the pallet is supported only by the Half-pallet support is **700 Kg UDL**
- when the pallet is also supported by the racking beams is **1400 Kg UDL**

Storage applications:

Half EUR-pallets (600 x 800 mm)

Tunnel bays

One Dexion solution suitable for both:

The Half-pallet support
