Shelfplan: Longspan Shelving

The versatile solution for storing large products and archives

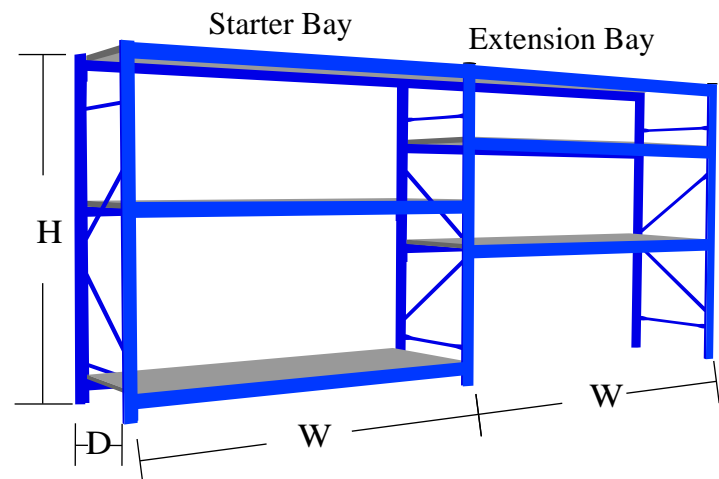

QUALITY FROM THE INVENTOR
OF THE STEEL STORAGE RACK

Shelfplan: Longspan Shelving

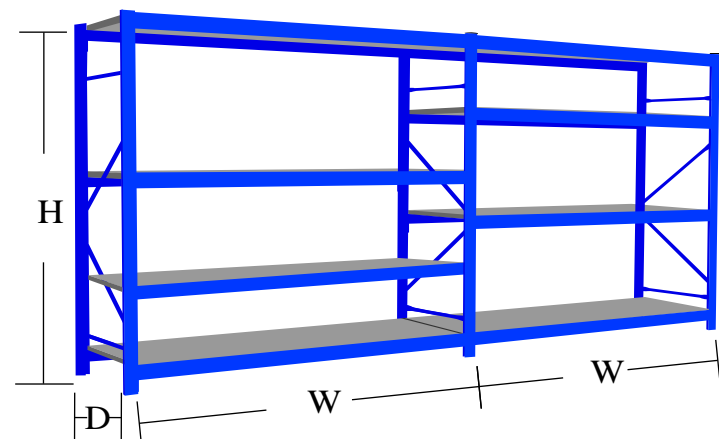

System Shelfplan bridges the gap between light-duty shelving and pallet racking. Applications range from storing single unit loads to sophisticated multi-level picking systems.

The system is suitable for storing a wide range of products, and is ideal for industrial, commercial and retail uses.

System Shelfplan can also be configured for hanging garment rail applications.

Bay Size: 3 Beam Levels incl. Steel Shelves (mm)	Load Capacity per Shelf Level	Starter Bay	Extension Bay
H x W x D	(kg)	Code	Code
1800 x 1800 x 600	1000	SP-001	SP-004

The standard dimensions above are mentioned in order to simplify the offer process.

The shelving can be made in any sizes, depending on the clients' needs.

Industrial Applications and Parts Storage

System Shelfplan, with its wide range of shelving formats is ideal for the protection, storage and organisation of valuable tooling, hardware, components, electronics, and other parts, both large and small.

- Can accommodate a vast range of different products
- Ideal for industrial and manufacturing environments
- Excellent for hand picking operations
- Economical central shelf dividers
- High capacity frames & beams for storing heavier items
- Attractive epoxy powder coated finish, blue as standard
- Other colours available on request

Archive Storage

Archive Storage Systems come in multiple sizes to store today's wide array of archived materials. System Shelfplan from Dexion is the practical solution for the bulk storage of documents and archive boxes.

- Compact high-density storage
- System flexibility to suit all types of archive boxes
- Available in standard starter and extension bays for prompt delivery
- Dividers, end panels and drawers available to adapt the system to individual needs
- Can be provided with either galvanized steel shelves or melaminated chipboard shelves

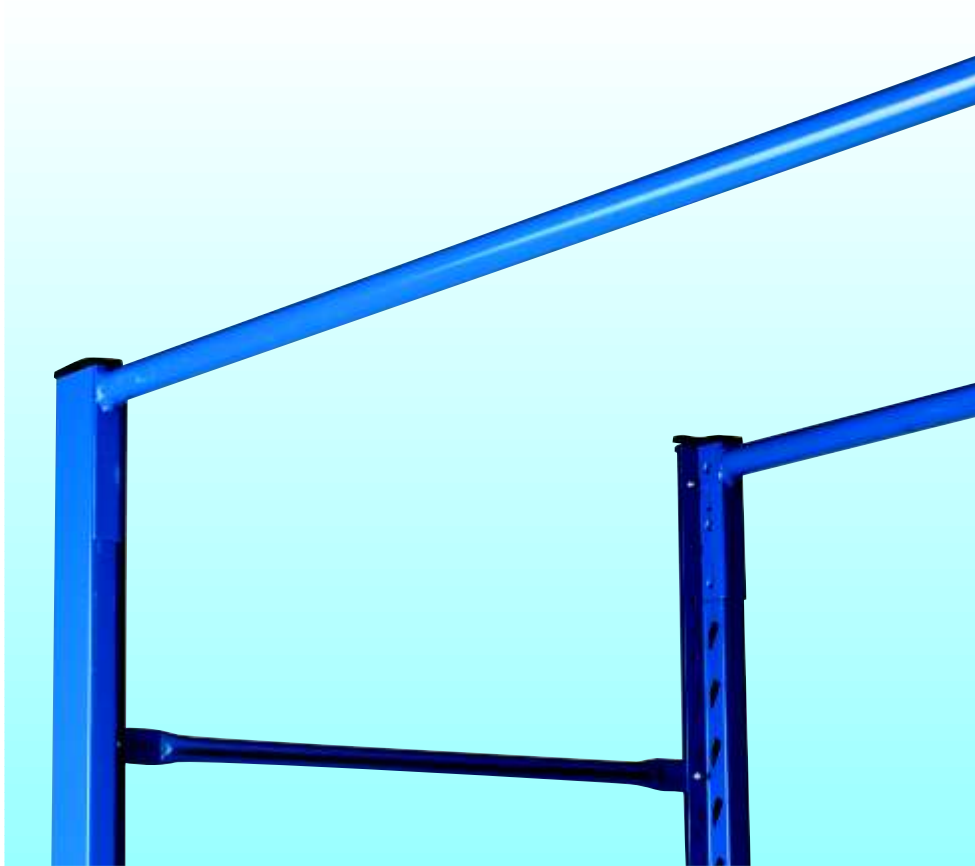

Hanging Garment Rail Systems

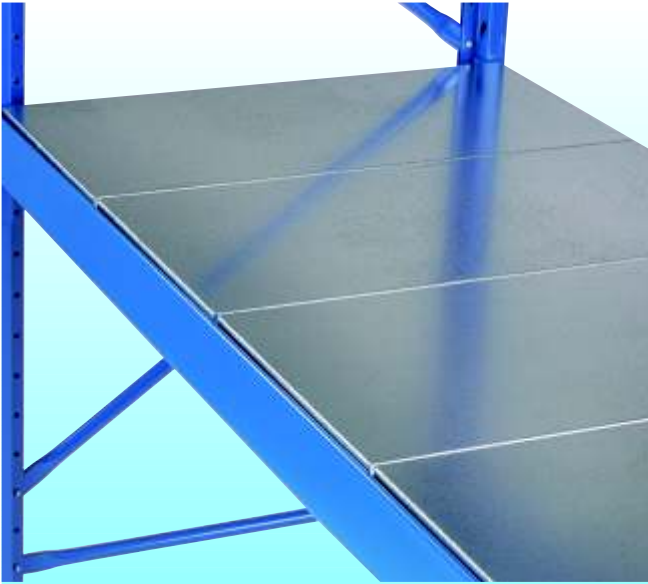

Used in retail, design, storage and transportation companies, System Shelfplan is excellent for Hanging Garment Rail Systems. Installed with tubular rails that replace beams, the system enables easy access and improved picking of garments or hangered items.

- High density garment storage
- Different capacity rails for multiple requirements
- Easily adjustable rail levels
- Aids continuous stock control operations
